Also Available

Coach's Handbook – Great resource for many of the basics
TIPPS – Activities to teach the process
Problem Solving PROCESS POINTERS for Students – Examples and practice for each step
Scenario, CmPS, Evaluation publications and MUCH MORE!

The Problem Solving Experience: **Classroom Curriculum Designed to** **Promote Problem Solving in the 21st Century**

The activities in this course are an outgrowth of the Future Problem Solving Program International, a program originally developed by E. Paul Torrance who was a pioneer in creativity. The curriculum provides direct instruction that introduces students to the creative problem solving process and then provides practice through the application of problem solving in a variety of contexts.

The curriculum is targeted at grades 5-8. It can be implemented as a full semester course, spread across a year, or split up across 2-4 years. There are also cross-curricular possibilities. The course consists of lesson plans for nine units, with extensive resources for each unit including handouts, overheads, and teacher reference materials.

Preparation for Problem Solving
Problem Solving Experience 1: Eensy Weensy Spider
Problem Solving Experience 2: The Elephant's Nose
Problem Solving Experience 3: Robin Hood
